

MUHAMMAD ALI JOYA

Full-Stack Developer (React, Next.js, Node.js)

Islamabad, Pakistan | +92 330 1812498 | alijoyamuhammad@gmail.com | github.com/malijoya | [Portfolio](#)

PROFESSIONAL SUMMARY

BSIT graduate (CGPA 3.34/4.00) and Full-Stack Developer experienced across the full web development lifecycle — from responsive React and Next.js frontends to PostgreSQL-backed features, cloud deployment, and QA. Currently building production features (including a cryptocurrency/token-related feature) for a live startup product, alongside interactive 3D interfaces with Three.js and native Android apps with Kotlin. Comfortable owning features end-to-end in fast-paced, cross-functional startup teams.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, Kotlin, SQL

Frameworks & Libraries: React.js, Next.js, Three.js, Tailwind CSS, Android Studio

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, IAM), Docker, Kubernetes, CI/CD Pipelines, Firebase

Tools & Collaboration: Git, GitHub, VS Code, Notion, Slack, Discord, Microsoft Office

WORK EXPERIENCE

Full-Stack Developer — Zedro Labs (Startup)

Jun 2026 – Present

- Build and maintain full-stack features using React, Next.js, and PostgreSQL for a live production startup product (client and project details confidential under NDA).
- Built and tested a cryptocurrency/token-related feature, contributing to both implementation and quality assurance.
- Perform manual QA testing (functional, regression, UI) across releases to catch issues before deployment.
- Coordinate task timelines and cross-functional communication using Notion, Slack, and Discord alongside hands-on development work.

Full-Stack Developer Intern — Cybill Nerd, Rawalpindi

Jan 2026 – Feb 2026

- Developed website UI components in a startup environment, translating design mockups into functional front-end code.
- Studied backend implementation in PHP alongside senior developers to understand full request/response flow.

Cloud Computing Associate — Hazza Institute of Technology, Islamabad

Mar 2025 – Jun 2025

- Built hands-on experience with Docker, Kubernetes, and CI/CD pipelines; deployed a full-stack web application to AWS.

Frontend Developer — Tech Harbor, Islamabad

Sep 2024 – Mar 2025

- Delivered front-end features for client projects, including interactive 3D interfaces built with Three.js.
- Deployed static sites via Netlify CI/CD pipelines, cutting client update turnaround from 2 days to under 30 minutes.

Web Developer Intern — C & W Resources, Rawalpindi

Jul 2024 – Sep 2024

- Built foundational front-end skills in HTML, CSS, and JavaScript while creating UI components for client pages.

PROJECTS

AI Resume Analyzer — AI-powered web app that analyzes resumes and suggests improvements. puter.com/app/ai-ai-resume-analyzer-1

3D Developer Portfolio — Interactive 3D portfolio site built with Three.js and React. my-portfolio-in-3d.vercel.app

Gradify Forge — Grading/productivity tool with a clean, responsive UI. github.com/malijoya/Gradify-Forge

Calculator Android App — Native Android calculator built with Kotlin and Android Studio. github.com/malijoya/Calculator

EDUCATION

BS, Information Technology — International Islamic University, Islamabad

Sep 2021 – Sep 2025

CGPA: 3.34 / 4.00

CERTIFICATIONS

Cloud Computing — HAZZA Institute (NAVTTTC)

Jul 2025 – Sep 2025

3-month course covering Docker containerization, Kubernetes orchestration, CI/CD pipelines, and AWS cloud services.
